

0X404 · SDC HACKATHON 2026 • SDG 9

SME GrantFlow

Turning everyday invoices into ready-to-sign government grants for Malaysian MSMEs.

Made with GAMMA

THE FRICTION

RM300M in grants. Too much friction.

7+

agency portals, fragmented deadlines, complex eligibility rules.

14–21

business days lost to manual back-and-forth.

35%

rejected for avoidable paperwork errors.

97.4%

of Malaysian businesses are MSMEs, yet fewer than 18% access matching funds.

Made with GAMMA

THE PRODUCT

Grants find the SME

1

Business signals

Invoices, quotations, and profile updates trigger opportunity discovery.

2

Verified fit

Deterministic rules verify eligibility; AI drafts the narrative.

3

Owner approval

Owners review, edit, and approve before signing.

Made with GAMMA

THE WORKFLOW

From expense to application in minutes

01

Ingest

Ingest an invoice or quotation.

02

Connect

Connect company, headcount, turnover, and spend data.

03

Draft

Run rules and draft the project story.

04

Review

Review the co-funding breakdown.

05

Submit

Generate a verified submission packet and audit log.

Made with GAMMA

THE CONTROL PLANE

Determinism where it matters. AI where it helps.

RULES ENGINE

Deterministic checks

- Equity, tenure, turnover caps, funding math.

AI

Useful acceleration

- OCR and tailored narrative drafts.

Every draft is transparent, editable, and human-approved.

Made with GAMMA

OPPORTUNITY RADAR

Opportunity Radar works year-round

- Pre-qualifies SMEs across 7 national grant programmes.
- Counts down opening and closing windows.
- Supports “apply with quotation” before major spend.
- Finds co-funding opportunities across agencies.

Made with GAMMA

TRUST LAYER

Trust is built into every event

Hash-chained history

SHA-256 records logins, checks, approvals, and submissions.

Tamper detection

Altered history is flagged.

Protected secrets

Secrets stay protected across local and cloud environments.

Made with GAMMA

Built for resilience, not demos

Experience

Next.js, React, TypeScript, Tailwind, and Vercel.

Core services

FastAPI on Replit Autoscale.

Intelligence

RunPod Serverless GPU with DeepSeek.

Data layer

Neon PostgreSQL plus local SQLite.

Fallback path

Cloud AI → GPU fallback → deterministic offline templates.

Made with GAMMA

THE IMPACT

Democratizing public capital for Malaysian SMEs

14 business days → under 15 minutes

more than 90% faster.

Zero

avoidable quantitative disqualification errors.

Aligned with UN SDG Target 9.3.

SME GrantFlow turns bureaucratic friction into automated economic growth.
